The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint219 < TSource, TOrthogonal > >`, is shown in a white box at the top. The derived class, `cl_move_base_z::EvWaypoint219 < TSource, TOrthogonal >`, is shown in a grey box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that `cl_move_base_z::EvWaypoint219` inherits from `boost::statechart::event`. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section contains the public attribute `+ waypointIndex`, and the bottom section is empty.
