A UML class diagram showing an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint105 < TSource, TOrthogonal > >`, is represented by a white box with a grey border and is divided into three horizontal compartments. The top compartment contains the class name. The derived class, `cl_move_base_z::EvWaypoint105 < TSource, TOrthogonal >`, is represented by a grey box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name, the middle compartment contains the public attribute `+ waypointIndex`, and the bottom compartment is empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.
