

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot_2::EvGlobalError"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class 'boost::statechart::event< EvGlobalError >'. It has three horizontal compartments, with the first containing the class name. A dark gray box at the bottom represents the derived class 'sm_dance_bot_2::EvGlobalError', also with three horizontal compartments, the first containing its name. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

sm_dance_bot_2::EvGlobal
Error
