

boost::statechart::
event< EvWaypoint168
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint168< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint168< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram shows a base class box at the top with a light gray background and a derived class box at the bottom with a darker gray background. A blue arrow with an open triangular head points from the derived class to the base class. The base class box is divided into three horizontal sections, with the first section containing the class name. The derived class box is divided into three horizontal sections, with the first section containing the class name and the second section containing a public attribute.
