The diagram shows a UML class hierarchy. At the top is a class box for `boost::statechart::event< EvWaypoint241 < TSource, TOrthogonal > >`. It has three horizontal compartments: the top one contains the class name, and the two below it are empty. Below this is a class box for `cl_move_base_z::EvWaypoint241 < TSource, TOrthogonal >`. This box has three compartments: the top one contains the class name, the middle one contains the attribute `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating inheritance.
