The diagram shows a class hierarchy. The base class is `boost::statechart::event< EvWaypoint133 < TSource, TOrthogonal > >`, represented by a white box with a thin border. The derived class is `cl_move_base_z::EvWaypoint133 < TSource, TOrthogonal >`, represented by a grey box with a thick border. A blue arrow with an open triangular head points from the derived class to the base class. The derived class has a public attribute `+ waypointIndex` in its second compartment.
