

sc::event< EvFinishDemo >

```
classDiagram
    class sc_event["sc::event< EvFinishDemo >"]
    class sm_moveit_4_EvFinishDemo["sm_moveit_4::EvFinishDemo"]
    sm_moveit_4_EvFinishDemo --|> sc_event
```

The diagram illustrates an inheritance relationship. At the top is a class box for `sc::event< EvFinishDemo >`, which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. At the bottom is a class box for `sm_moveit_4::EvFinishDemo`, which is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are shaded gray. A blue arrow with an open triangular head points from the top section of the `sm_moveit_4::EvFinishDemo` box to the top section of the `sc::event< EvFinishDemo >` box, indicating that `sm_moveit_4::EvFinishDemo` inherits from `sc::event< EvFinishDemo >`.

sm_moveit_4::EvFinishDemo
