

```
boost::statechart::  
event< EvTimer< TSource,  
      TObjectTag > >
```

The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvTimer< TSource, TObjectTag > >`, is represented by a white box with a gray border and is divided into three horizontal sections. The top section contains the class name. The derived class, `cl_ros_timer::EvTimer< TSource, TObjectTag >`, is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name. A blue arrow with an open triangular head points from the top section of the derived class box to the bottom section of the base class box, indicating inheritance.

```
cl_ros_timer::EvTimer  
< TSource, TObjectTag >
```
