

```
boost::statechart::  
event< EvWaypoint3<  
    TSource, TOrthogonal > >
```

A UML class diagram showing inheritance. The base class, `boost::statechart::event< EvWaypoint3< TSource, TOrthogonal > >`, is represented by a white box with a grey border and two empty compartments below the name. The derived class, `cl_move_base_z::EvWaypoint3< TSource, TOrthogonal >`, is represented by a grey box with a black border. It has a public attribute `+ waypointIndex` in its second compartment. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.

```
cl_move_base_z::EvWaypoint3  
    < TSource, TOrthogonal >
```

```
+ waypointIndex
```
