The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint167 < TSource, TOrthogonal > >`, is shown in a white box with a thin grey border. It has two empty compartments below the header. The derived class, `cl_move_base_z::EvWaypoint167 < TSource, TOrthogonal >`, is shown in a grey box with a thick black border. It has a header compartment, a compartment containing the public attribute `+ waypointIndex`, and an empty bottom compartment. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box.
