

boost::statechart::
event< EvFinishDemo >

```
classDiagram
    class Base["boost::statechart::event< EvFinishDemo >"]
    class Derived["sm_fetch_two_table _whiskey_pour::EvFinishDemo"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. The base class, 'boost::statechart::event< EvFinishDemo >', is represented by a white box with a thin grey border and is divided into three horizontal sections. The top section contains the class name. The derived class, 'sm_fetch_two_table _whiskey_pour::EvFinishDemo', is represented by a grey box with a thick black border and is also divided into three horizontal sections. The top section contains the class name. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

sm_fetch_two_table
_whiskey_pour::EvFinishDemo
