The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: boost::statechart::event< EvWaypoint122 < TSource, TOrthogonal > >. Below it is a grey box representing the derived class: cl_move_base_z::EvWaypoint122 < TSource, TOrthogonal >. A blue arrow with an open triangular head points from the derived class box up to the base class box. The derived class box has two additional sections: the middle section contains '+ waypointIndex' and the bottom section is empty.
