

boost::statechart::
event< EvWaypoint176
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint176< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint176< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A base class box at the top contains the text 'boost::statechart::event< EvWaypoint176< TSource, TOrthogonal > >'. It has two empty compartments below the text. A derived class box at the bottom, shaded gray, contains 'cl_move_base_z::EvWaypoint176< TSource, TOrthogonal >' in its top compartment, '+ waypointIndex' in its middle compartment, and is empty in its bottom compartment. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box.

cl_move_base_z::EvWaypoint176
< TSource, TOrthogonal >

+ waypointIndex
