

```
boost::statechart::  
event< EvWaypoint204  
< TSource, TOrthogonal > >
```

The diagram shows a UML class hierarchy. At the top is the base class `boost::statechart::event< EvWaypoint204 < TSource, TOrthogonal > >`, represented by a white box with a thin grey border. Below it is the derived class `cl_move_base_z::EvWaypoint204 < TSource, TOrthogonal >`, represented by a grey box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.

```
cl_move_base_z::EvWaypoint204  
  < TSource, TOrthogonal >
```

```
+ waypointIndex
```
