The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `boost::statechart::event< EvWaypoint211< TSource, TOrthogonal > >`. It has two empty compartments below the name. At the bottom is a grey box representing the derived class `cl_move_base_z::EvWaypoint211< TSource, TOrthogonal >`. It has two compartments: the top one contains `+ waypointIndex`, and the bottom one is empty. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.
