

```
boost::statechart::  
event< EvWaypoint184  
< TSource, TObjectTag > >
```

The diagram shows a base class box at the bottom and a derived class box at the top. A blue arrow with an open triangular head points from the base class to the derived class, indicating inheritance. The base class box is shaded gray and contains the text 'cl_move_base_z::EvWaypoint184 < TSource, TObjectTag >' in the top section, '+ waypointIndex' in the middle section, and an empty section at the bottom. The derived class box is white and contains the text 'boost::statechart::event< EvWaypoint184 < TSource, TObjectTag > >' in the top section, and two empty sections below it.

```
cl_move_base_z::EvWaypoint184  
  < TSource, TObjectTag >
```

```
+ waypointIndex
```
