The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint155 < TSource, TOrthogonal > >`. It has three horizontal compartments, with the first containing the class name. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint155 < TSource, TOrthogonal >`. It also has three horizontal compartments. The first compartment contains the class name, the second contains the public attribute `+ waypointIndex`, and the third is empty. A blue arrow with an open triangular head points from the top of the gray box to the bottom of the white box, indicating inheritance.
