

```
boost::statechart::  
event< EvWaypoint230  
< TSource, TOrthogonal > >
```

A UML diagram showing inheritance. A blue arrow with an open triangular head points from the class `cl_move_base_z::EvWaypoint230` to the class `boost::statechart::event< EvWaypoint230 < TSource, TOrthogonal > >`. The target class is a white box with three horizontal compartments. The source class is a grey box with three horizontal compartments. The first compartment of the source class contains the class name and template parameters. The second compartment contains a public attribute `+ waypointIndex`. The third compartment is empty.

```
cl_move_base_z::EvWaypoint230  
  < TSource, TOrthogonal >
```

```
+ waypointIndex
```
