

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot_2::EvGlobalError"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship between two classes. The base class, located at the top, is named 'boost::statechart::event< EvGlobalError >' and is represented by a white box with a thin grey border. It contains two empty rectangular compartments below its name. The derived class, located at the bottom, is named 'sm_dance_bot_2::EvGlobalError' and is represented by a grey box with a thick black border. It also contains two empty rectangular compartments below its name. A blue arrow points from the top of the derived class box to the bottom of the base class box, indicating that 'sm_dance_bot_2::EvGlobalError' inherits from 'boost::statechart::event< EvGlobalError >'.
