

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_strikes_back["sm_dance_bot_strikes_back::EvGlobalError"]
    boost_statechart_event <|-- sm_dance_bot_strikes_back
```

The diagram shows a class hierarchy. The base class, 'boost::statechart::event< EvGlobalError >', is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name. The derived class, 'sm_dance_bot_strikes_back::EvGlobalError', is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name. A blue arrow points from the top of the derived class box to the bottom of the base class box, indicating inheritance.
