

```
cl_move_base_z::backward  
_local_planner::BackwardLocalPlanner  
::checkCarrotHalfPlainConstraint
```

A rectangular box with a black border and a light gray background. It contains three lines of C++ code. The first line is a namespace-qualified function call. The second line is a namespace-qualified class name. The third line is a namespace-qualified member function call.

```
cl_move_base_z::backward  
_local_planner::BackwardLocalPlanner  
::computeVelocityCommands
```

A rectangular box with a black border and a white background. It contains three lines of C++ code. The first line is a namespace-qualified function call. The second line is a namespace-qualified class name. The third line is a namespace-qualified member function call. A blue arrow points from the right side of this box to the left side of the gray box.
