

boost::statechart::
event< EvWaypoint119
< TSource, TObjectTag > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint119< TSource, TObjectTag > >"]
    class Derived["cl_move_base_z::EvWaypoint119< TSource, TObjectTag >"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class, and a darker gray box at the bottom represents the derived class. A blue arrow with an open triangular head points from the derived class to the base class. The base class box is divided into three horizontal sections, with the first section containing the class name. The derived class box is divided into three horizontal sections, with the first section containing the class name and the second section containing a public member variable.

cl_move_base_z::EvWaypoint119
< TSource, TObjectTag >
