

boost::statechart::
event< EvWaypoint117
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint117< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint117< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A base class box at the top contains the text 'boost::statechart::event< EvWaypoint117 < TSource, TOrthogonal > >'. It is divided into three horizontal sections, with the first section containing the text. A blue arrow with an open triangular head points from the bottom of a derived class box to the bottom of the base class box. The derived class box at the bottom is shaded gray and contains the text 'cl_move_base_z::EvWaypoint117 < TSource, TOrthogonal >' in its top section, '+ waypointIndex' in its middle section, and is empty in its bottom section.

cl_move_base_z::EvWaypoint117
< TSource, TOrthogonal >

+ waypointIndex
