The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvWaypoint235 < TSource, TOrthogonal > >`, is represented by a white box with a thin grey border. It has two empty rectangular compartments below its name. The derived class, `cl_move_base_z::EvWaypoint235 < TSource, TOrthogonal >`, is represented by a grey box with a thick black border. It has a public attribute `+ waypointIndex` in its second compartment. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.
