The diagram illustrates an inheritance relationship. A base class, `boost::statechart::event< EvWaypoint210 < TSource, TOrthogonal > >`, is shown in a white box at the top. It has two empty compartments below its name. A derived class, `cl_move_base_z::EvWaypoint210 < TSource, TOrthogonal >`, is shown in a grey box at the bottom. It has two compartments: the top one contains `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
