

```
boost::statechart::  
event< EvWaypoint90  
< TSource, TObjectTag > >
```

The diagram illustrates an inheritance relationship. A blue arrow points from the 'move_base_z_client' class to the 'boost::statechart::event' class. The 'boost::statechart::event' class is shown as a white box with a black border, containing the text 'boost::statechart::event< EvWaypoint90 < TSource, TObjectTag > >'. The 'move_base_z_client' class is shown as a grey box with a black border, containing the text 'move_base_z_client::EvWaypoint90< TSource, TObjectTag >' and '+ waypointIndex'.

```
move_base_z_client  
::EvWaypoint90< TSource,  
TObjectTag >
```

```
+ waypointIndex
```
