

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot_2::EvGlobalError"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class 'boost::statechart::event< EvGlobalError >'. It has two empty rectangular compartments below the name. A dark gray box at the bottom represents the derived class 'sm_dance_bot_2::EvGlobalError', which also has two empty rectangular compartments below its name. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

sm_dance_bot_2::EvGlobal
Error
