A UML class diagram showing inheritance. The base class is `boost::statechart::event< EvWaypoint165 < TSource, TObjectTag > >`, represented by a white box with a light gray border and two empty compartments below the name. The derived class is `cl_move_base_z::EvWaypoint165 < TSource, TObjectTag >`, represented by a gray box with a black border and two compartments below the name: the first contains `+ waypointIndex` and the second is empty. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance.
