

```
boost::statechart::  
event< EventA< TSource,  
    TObjectTag > >
```

The diagram shows two class boxes. The top box is white and contains the text 'boost::statechart::event< EventA< TSource, TObjectTag > >'. The bottom box is gray and contains the text 'smacc::state_reactors::EventA< TSource, TObjectTag >'. A blue arrow with an open triangular head points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
smacc::state_reactors  
::EventA< TSource, TObjectTag >
```
