

```
boost::statechart::  
event< MoveGroupMotionExecution  
Succeeded< TSource, TObjectTag > >
```

The diagram illustrates an inheritance relationship. A blue arrow points from the 'moveit_z_client::MoveGroupMotionExecutionSucceeded' class to the 'boost::statechart::event' class. The 'boost::statechart::event' class is represented by a white box with a thin black border, divided into three horizontal sections. The top section contains the class name and its template parameters. The 'moveit_z_client::MoveGroupMotionExecutionSucceeded' class is represented by a gray box with a thin black border, also divided into three horizontal sections. The top section contains the class name and its template parameters. The arrow indicates that the gray box class inherits from the white box class.

```
moveit_z_client::MoveGroup  
MotionExecutionSucceeded  
< TSource, TObjectTag >
```
