The diagram shows a base class (white box) and a derived class (shaded box). The base class is `boost::statechart::event< EvWaypoint207 < TSource, TObjectTag > >`. The derived class is `cl_move_base_z::EvWaypoint207 < TSource, TObjectTag >` and has a public attribute `+ waypointIndex`. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.
