

```
boost::statechart::  
event< MoveGroupMotionExecution  
Succeeded< TSource, TObjectTag > >
```

The diagram shows a vertical inheritance relationship. At the bottom is a gray-shaded box representing the `move_group_interface` class. It contains the text `move_group_interface`, `_client::MoveGroupMotionExecution`, and `Succeeded< TSource, TObjectTag >`. Above it is a white box representing the `boost::statechart::event<...>` class. It contains the text `boost::statechart::`, `event< MoveGroupMotionExecution`, and `Succeeded< TSource, TObjectTag > >`. A blue arrow with an open triangular head points from the top of the gray box to the bottom of the white box, indicating that `move_group_interface` inherits from `boost::statechart::event<...>`.

```
move_group_interface  
_client::MoveGroupMotionExecution  
Succeeded< TSource, TObjectTag >
```
