The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvWaypoint223 < TSource, TOrthogonal > >`. A dark gray box at the bottom represents the derived class `cl_move_base_z::EvWaypoint223 < TSource, TOrthogonal >`. A blue arrow with an open triangular head points from the derived class to the base class. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section contains the public attribute `+ waypointIndex`, and the bottom section is empty.
