

```
cl_move_base_z::undo  
_path_global_planner  
::UndoPathGlobalPlanner  
::initialize
```

A diagram showing a call sequence. A gray box on the left contains the code for the `initialize` method. A blue arrow points from this box to a white box on the right, which contains the code for the `onForwardTrailMsg` method. Both boxes contain the same prefix code: `cl_move_base_z::undo`, `_path_global_planner`, and `::UndoPathGlobalPlanner`.

```
cl_move_base_z::undo  
_path_global_planner  
::UndoPathGlobalPlanner  
::onForwardTrailMsg
```
