

boost::statechart::  
event< EvWaypoint111  
< TSource, TOrthogonal > >

```
classDiagram
    class BaseEvent["boost::statechart::event< EvWaypoint111< TSource, TOrthogonal > >"]
    class DerivedEvent["cl_move_base_z::EvWaypoint111< TSource, TOrthogonal >"]
    DerivedEvent --|> BaseEvent
```

The diagram illustrates a generalization relationship between two event types. The top box represents the base event type, and the bottom box represents the derived event type. A blue arrow with an open triangular head points from the derived event to the base event, indicating that the derived event inherits from or specializes the base event.

cl\_move\_base\_z::EvWaypoint111  
< TSource, TOrthogonal >
