

```
sm_fetch_two_table  
_pick_n_place_1::pick  
_states::StCloseGripper  
::onExit
```

A diagram showing a transition from a state to a requirement. On the left, a gray rectangular box contains the text 'sm\_fetch\_two\_table', '\_pick\_n\_place\_1::pick', '\_states::StCloseGripper', and '::onExit'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'smacc::ISmaccState' and '::requiresClient'.

```
smacc::ISmaccState  
::requiresClient
```
