

boost::statechart::  
event< EvWaypoint200  
< TSource, TOrthogonal > >

The diagram shows a UML class hierarchy. At the top is a class box for `boost::statechart::event< EvWaypoint200 < TSource, TOrthogonal > >`. It has three horizontal compartments: the top one contains the class name, and the other two are empty. Below it is a class box for `cl_move_base_z::EvWaypoint200 < TSource, TOrthogonal >`. This box has three compartments: the top one contains the class name, the middle one contains the attribute `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the top compartment of the bottom class box to the top compartment of the top class box, indicating inheritance.

cl\_move\_base\_z::EvWaypoint200  
< TSource, TOrthogonal >

+ waypointIndex
