The diagram shows a UML class hierarchy. The base class, 'boost::statechart::event< EvWaypoint168 < TSource, TOrthogonal > >', is represented by a white box with a thin grey border. It has two empty compartments below the name. The derived class, 'cl_move_base_z::EvWaypoint168 < TSource, TOrthogonal >', is represented by a grey box with a thick black border. It has two compartments: the top one contains '+ waypointIndex' and the bottom one is empty. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
