The diagram shows a UML class hierarchy. At the top is the base class `boost::statechart::event< EvWaypoint123 < TSource, TOrthogonal > >`. Below it is the derived class `cl_move_base_z::EvWaypoint123 < TSource, TOrthogonal >`. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class has a public attribute `+ waypointIndex`.
