

boost::statechart::  
event< EvEStop >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvEStop >"]
    class sm_packML_EvEStop["sm_packML::EvEStop"]
    boost_statechart_event <|-- sm_packML_EvEStop
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box representing the base class `boost::statechart::event< EvEStop >`. It is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below this box is a blue arrow pointing upwards, with a hollow triangle at its tip. At the bottom is a gray rectangular box representing the derived class `sm_packML::EvEStop`. It is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. The arrow points from the top of the gray box to the bottom of the white box, indicating that `sm_packML::EvEStop` inherits from `boost::statechart::event< EvEStop >`.

sm\_packML::EvEStop
