

```
boost::statechart::  
event< EvKeyPressO<  
    TSource, TObjectTag > >
```

A UML class diagram showing inheritance. The base class, `boost::statechart::event< EvKeyPressO< TSource, TObjectTag > >`, is represented by a white box with a thin black border and is divided into three horizontal sections. The derived class, `cl_keyboard::EvKeyPressO< TSource, TObjectTag >`, is represented by a gray box with a thick black border and is also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the derived class box to the bottom section of the base class box, indicating that the derived class inherits from the base class.

```
cl_keyboard::EvKeyPressO  
< TSource, TObjectTag >
```
