

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_strikes_back["sm_dance_bot_strikes_back::EvGlobalError"]
    boost_statechart_event <|-- sm_dance_bot_strikes_back
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class 'boost::statechart::event< EvGlobalError >'. It has three horizontal compartments, with the first containing the class name. A dark gray box at the bottom represents the derived class 'sm_dance_bot_strikes_back::EvGlobalError'. It also has three horizontal compartments, with the first containing the class name. A blue arrow points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

sm_dance_bot_strikes
_back::EvGlobalError
