

```
boost::statechart::  
event< EvKeyPressW<  
    TSource, TObjectTag > >
```

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvKeyPressW< TSource, TObjectTag > >"]
    class cl_keyboard_EvKeyPressW["cl_keyboard::EvKeyPressW< TSource, TObjectTag >"]
    boost_statechart_event <|-- cl_keyboard_EvKeyPressW
```

The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvKeyPressW< TSource, TObjectTag > >`, is shown in a white box with a thin black border. The derived class, `cl_keyboard::EvKeyPressW< TSource, TObjectTag >`, is shown in a gray box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating that `cl_keyboard::EvKeyPressW` inherits from `boost::statechart::event`.

```
cl_keyboard::EvKeyPressW  
< TSource, TObjectTag >
```
