The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: boost::statechart::event< EvWaypoint118 < TSource, TObjectTag > >. Below it is a grey box representing the derived class: cl\_move\_base\_z::EvWaypoint118 < TSource, TObjectTag >. The derived class has a public attribute + waypointIndex. A blue arrow with an open triangular head points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.
