

```
boost::signals2::signal  
< Signature, Combiner,  
  Group, GroupCompare, SlotFunction,  
    ExtendedSlotFunction, Mutex >
```

The diagram illustrates an inheritance relationship between two C++ signal classes. At the bottom is a box for `smacc::SmaccSignal`, which is shaded gray and contains the same parameter list as the base class. A blue arrow with an open triangular head points from the top of this box to the bottom of the top box, indicating that `smacc::SmaccSignal` inherits from `boost::signals2::signal`. The top box is white and represents the base class.

```
smacc::SmaccSignal  
< Signature, Combiner,  
  Group, GroupCompare,  
  SlotFunction, ExtendedSlotFunction,  
    Mutex >
```
