

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot_2::EvGlobalError"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvGlobalError >`, is represented by a white rectangular box with a thin gray border, divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, `sm_dance_bot_2::EvGlobalError`, is represented by a gray rectangular box with a thin black border, also divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. A blue arrow points from the top center of the derived class box to the bottom center of the base class box, indicating that `sm_dance_bot_2::EvGlobalError` inherits from `boost::statechart::event< EvGlobalError >`.
