The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint135 < TSource, TOrthogonal > >`, is shown in a white box with a thin grey border. It has two empty compartments below the name. The derived class, `cl_move_base_z::EvWaypoint135 < TSource, TOrthogonal >`, is shown in a grey box with a thick black border. It has a third compartment containing the attribute `+ waypointIndex`. A blue arrow with an open triangular head points from the derived class to the base class.
