

```
boost::statechart::  
event< EvWaypoint88  
< TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box is white and contains the text 'boost::statechart::event< EvWaypoint88 < TSource, TObjectTag > >'. The bottom box is gray and contains the text 'move_base_z_client::EvWaypoint88< TSource, TObjectTag >' followed by a public attribute '+ waypointIndex'. A blue arrow with a hollow triangular head points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
move_base_z_client  
::EvWaypoint88< TSource,  
TObjectTag >
```

```
+ waypointIndex
```
