The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint78 < TSource, TObjecTag > >`, is shown in a white box with a thin black border. The derived class, `cl_move_base_z::EvWaypoint78 < TSource, TObjecTag >`, is shown in a gray box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class. The derived class has a public attribute `+ waypointIndex` shown in its second compartment.
