

```
boost::statechart::  
event< EvTimer< TSource,  
      TObjectTag > >
```

A UML class diagram illustrating inheritance. The base class, `boost::statechart::event< EvTimer< TSource, TObjectTag > >`, is shown in a white box with a gray border and is divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. The derived class, `cl_ros_timer::EvTimer< TSource, TObjectTag >`, is shown in a gray box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating an inheritance relationship.

```
cl_ros_timer::EvTimer  
< TSource, TObjectTag >
```
